As a seasoned Senior Product Leader and Digital Transformation Expert with over 20 years of experience delivering innovative solutions across industries such as Retail, E-Commerce, Consumer Goods, Distributors, Hotels/Hospitality/QSR, and Supply Chain, **I am actively seeking Senior Leadership roles in Product Development or Product Management within Services/Systems Integrator organizations.** My expertise includes solving complex business challenges for enterprise platforms and smart devices, enabling digital transformation, and driving measurable outcomes. Additionally, I bring hands-on expertise in **Generative AI (end-user applications) and exposure to Agentic AI, leveraging these technologies to foster innovation and deliver cutting-edge solutions.** I am passionate about guiding cross-functional teams to success, fostering innovation, and leveraging advanced technologies to deliver impactful business outcomes. With a proven track record of leading transformative initiatives, I am well-positioned to drive growth and innovation in dynamic, fast-paced environments.

PROFESSIONAL SUMMARY

- ⇒ Highly accomplished professional with expertise in roles such as Product Director, Senior Group Product Manager, IT Manager, Business Consultant (specializing in brick-and-mortar retail and e-commerce), Senior Product Manager, Functional Architect, Retail Functional Expert, Retail Domain Trainer, and former business owner of a retail convenience chain.
- ⇒ Proven expertise in designing, implementing, managing, and enhancing transaction processing systems, including e-commerce systems, retail store systems, merchandise management systems, customer relationship management, loyalty management, customer engagement, inventory management systems, wet stock monitoring and ordering systems, and eCommerce delivery options (BOPIS, Curb Side Pickup).
- ⇒ Possess in-depth knowledge of various systems, such as Digit7's DigitKart, DigitMart, Digit Square, Digit Robo, Digit Snap, Blue Yonder's Enterprise Store Operations, 7NOW's Delivery Ecosystem, 7EECOM ecosystem, 7-Eleven Alternative Retail formats, Echidna-Syntap's Customer Engagement Suite, in-store map and content management systems, JDA Customer Engagement and Web Commerce Solutions, JDA Point-of-Sale, JDA Back Office and Central Office systems, and Portfolio Mobile Access solutions.
- ⇒ Successfully handled the internal integration releases of JDA POS and JDA Merchandise Management systems independently. Skilled in JDA Merchandise Management and Customer Relationship Management systems, with hands-on exposure to IBM Smarter Commerce suite, including WebSphere Commerce Server, Sterling/IBM Selling and Fulfillment Suite, Unica, Coremetrics, Field Sales, and Field Service solutions. Primary exposure to the salesforce.com ecosystem.
- ⇒ Results-driven professional with a proven track record of driving business growth and profitability through productivity enhancements, customer experience improvements, digital transformation, and innovation. Skilled in fostering business agility, reducing costs and risks, accelerating time-to-market, and achieving competitive differentiation. Experienced in leading initiatives for market share growth, revenue expansion, regulatory compliance, cultural transformation, and partner coordination to deliver exceptional organizational outcomes.

Retail System Standards	aha.io, Atlassian JIRA
Product Management	Microsoft DOS, Microsoft Windows, Apple Mac OS
Operating Systems	Microsoft SQL Server 2xxx, My SQL, Microsoft Access
Databases	
Hardware	Integrated Payment Systems (direct interface of PIN pad with POS), Barcode Readers, Printers, Bump Bar basic Configuration, Cash Drawers, Mobile Portable Data Terminals (Symbol Mx-Series), exposure to other retail hardware used on the shop floor
Test and Defect Tracking Systems	Atlassian JIRA (Inc. Test Rail), Team track, Mozilla Bugzilla (Menards Client Facing)
Desktop Applications Development Methodology	Microsoft Word, Excel, PowerPoint, Visio, OneNote, Project Agile
Project Management	Version One, Microsoft Project, Atlassian JIRA (user story creation, management, and defect tracking tool)
Document Repositories	Atlassian Confluence, Microsoft SharePoint
UI Mockup tools	Balsamiq, Axure RP, Invision, Zeplin.io
Collaboration and Product Management Tooling	#Slack, Smartsheet, Monday.com, Trello, Coggle, Mindmup, MindMeister (Administrator and Configuration know-how)
POS Solutions	JDA Point-of-Sale, Oracle Retail POS, SAP for back-end operations, Radiant Systems- a division of NCR (@ 7-Eleven), Three legacy POS systems as part of my retail career, Adelaide Business Software's Retail Touch, ISS POS, Infinity POS, POSTEC PCC-Petrol Communications Controller
POS Industries Exposed	Fuel and Convenience, Grocery, Specialty, Electronics, Footwear
Custom Application Requirements (Ideated and Authored)	Records Management System, Invoice Processing System/Business Document Management System, Sales and Media Reconciliation System, Cloud + Mobile Inventory Management System, Master Data Organizer and Publisher

7-Eleven Business Teams Liaised	Accounting, Acquisition and Integration, Asset Protection, SEI Canada, Communication, Construction, Energy, and Digital Facilities, Finance, Franchising, Fuels, Human Resources, Information Technology Internal Audit, Legal Counsel, Logistics, Marketing, Merchandising, Operations Support, Payroll, Operations Planning, Procurement, Real Estate, Store Operations, Tax, Treasury
Ideas Contributed-Convenience Industry Firsts (7-Eleven)	Sell age-restricted merchandise (tobacco and alcohol) on mobile apps (adhering to compliance and conformance dictated by the local bodies), convenience store competes with restaurateurs and alcohol retail delivery providers on food and alcohol delivery apps
Inefficiencies Addressed (7-Eleven)	Enable digital receipts, RFID/HID scanning for network-connected printers to enhance security, transparency, accountability, and reduce carbon footprint, Dynamic QR Codes for reporting enterprise-level inefficiencies (multi-pronged use cases), Digital Asset Management, Store Check-in Simplification processes
Master Data Management Systems (Exposure)	Oracle Supplier Hub, Oracle Site Hub, Oracle Data Relationship Management (formerly Hyperion DRM)
Data + ETL Tooling (Exposure)	Query Surge, Kyvos Insights, Piperr

EMPLOYMENT CHRONICLE

Two Freelance Engagements, Hyderabad

Mar 2025- Dec 2025

Client Requirements: Alekta Solutions, AI Resource Exploration Private Limited (Private Engagements)

KEY DELIVERABLES

- ⇒ Authored 30+ CustomGPTs to facilitate the creation of diverse artifacts for (**ready for demonstration**)
 - Pre-Sales and Sales
 - Problem elicitation and solution articulation for a quick sign-off (< 1 hr.)
 - Product Management
 - Enterprise Technical, Cloud Architect
 - Project/Program/Portfolio
 - Data Engineering, Data Analysis, and Data Scientist
 - Design Deliverables
 - Coding Assistants (not intelligent IDEs)
- ⇒ Led end-to-end requirements and solution architecture for Hyperswitch payment orchestration enablement and Conexus standards integration for a Phoenix, AZ-based POS solution provider, producing detailed functional specifications, target architecture, and implementation-ready documentation.
- ⇒ Defined POS hardware evaluation framework, established customer support workflows, and facilitated Magellan weighing scale integration, ensuring seamless operational readiness and integration compliance.
- ⇒ Ideated, conceptualized, architected, and documented the functional and solution architecture for a GIS + PDF Analyzer platform enabling AI-driven mineral exploration, with implementation scheduled/pending.

Brillio Technologies Private Limited

Product Director (Associate)

Mar 2024- March 2025

Hyderabad

Teams Liaised with: CTO and CIO Offices, Digital Transformation Consulting, Sustainability and Corporate Social Responsibility, Product Management, Product Engineering (Back-end, Front-End, DevOps, DataOps), Platform and Product Engineering, Solutions, Customer Experience Transformation, Pre-Sales, Lead to Revenue, Marketing Technology, Learning and Development, Proposals, Quality Assurance, Verification and Validation, Data Analytics and AI, Hyper Intelligent Automation, Pivotal Cloud Foundry, MEC, Digital Infrastructure and Security, Design Studio, Horizontal.

Thought Leadership: Points of View, Thought Leadership, Case Studies, Competitor Analysis, Market Research, Customer Market Intelligence, Solution Needs and Know-How.

Client Requirements Serviced: Albertson's, Trader Joe's, Tesco, Lineage Logistics, McDonald's, Yum! Brands (KFC, Pizza Hut, Taco Bell – UK and Ireland), 7-Eleven, Toast POS, Reece, Coty.

Vendors Liaising-Implementation Know-How Documentation: AWS, Microsoft Azure, Google Cloud Platform, Magento, Salesforce

KEY DELIVERABLES

- ⇒ Devised GTM strategies for the Retail, Consumer Goods, QSR, and Supply Chain verticals, addressing key client specific challenges at Brillio.
- ⇒ Developed a comprehensive strategy to synthesize insights from leading analyst firms, including Gartner, Forrester, IDC, Everest Group, HFS Research, NelsonHall, KPMG, Deloitte, Accenture, ISG, Ovum, Frost & Sullivan, MarketsandMarkets, TechNavio, ResearchAndMarkets, Statista, and Markets Research Reports, for integration into actionable business strategies and decision-making frameworks.

- ⇒ Conducted competitive analysis and applied Blue Ocean Strategy, identifying more than 45+ market gaps and driving innovation that increased market penetration by 20%.
- ⇒ Authored 10+ strategic Points of View on directly influencing C-suite decisions.
- ⇒ Created 20+ Sales Battle Cards for offerings like Loyalty Optimization and Predictive Demand Planning, enhancing sales conversion rates by 25%.
- ⇒ Developed 15 marketing materials showcasing solutions such as Retail Fraud Detection and Omnichannel Engagement, improving solution visibility by 40%.
- ⇒ Designed frameworks for Virtual Assistants, Automated Replenishment, and Freight Cost Optimization, achieving a 20% reduction in inventory holding costs.
- ⇒ Enhanced supply chain efficiency by 25% with targeted solutions for Inventory Optimization in Retail and Consumer Goods.
- ⇒ Developed 110+ industry-specific learning modules incorporating Generative AI, reducing training time by 30% while improving knowledge retention by 20%.
- ⇒ Implemented Generative AI tools in learning ecosystems, reducing external contractor costs by 50% and increasing content delivery speed by 40%.
- ⇒ Created AI-driven solutions for Hyper-Personalized Recommendations and Predictive Demand Planning, increasing customer satisfaction by 30% and operational efficiency by 25%.
- ⇒ Directed initiatives for cloud-native architectures, enhancing scalability by 30% and achieving a 25% reduction in downtime.
- ⇒ Designed reusable frameworks for data quality management using advanced ETL tools, reducing data errors by 40% and ensuring 99% data integrity.
- ⇒ Delivered 12 actionable Points of View (PoVs) addressing retail challenges, aligned with C-level priorities, and influenced decisions on project investments ranging \$250K-\$4.5M. Key components include (not limited to) Industry and market trends, Business needs and impacts, Solution requirements, Comparative analysis of COTS vs. bespoke solutions, Systems integration considerations, Risk and mitigation strategies (including potential failure points and recovery plans), RACI and escalation matrix, Solution Deliverables list, Regulatory and statutory compliance, Program performance measurement.
- ⇒ Created, organized, and structured a reusable repository for pre-sales initiatives, reusable resources, solution proposals, and PoV workflow optimization. Facilitated brainstorming and collaboration using tools to evangelize, identify, and coordinate solution offerings based on business needs.
- ⇒ Transformed customer feedback into actionable insights with GenAI-driven review summarization, improving response time by 40% and customer satisfaction by 30%.
- ⇒ Proofread and enhanced the practice newsletter, suggesting innovative, engaging, and educational topics to make it informative and enjoyable for the audience.

CAREER MILESTONES

- Trained business consultants, L&D solution partners, and senior leaders on leveraging GenAI tools, improving operational efficiency and reducing daily task delivery time to one-fifth.
- Devised innovative Go-to-Market (GTM) strategies for the Retail, Consumer Goods, QSR, and Supply Chain verticals at Brillio by synthesizing insights from existing and prospective clients' annual reports, media insights, competitor analysis, and internal intelligence. Successfully addressed key client-specific challenges, resulting in a 25% improvement in focused Points of View development and driving impactful, strategic initiatives.
- Identified solution accelerators addressing customer pain points, reducing time-to-market for solutions by 40% and achieving a 95% customer satisfaction rate.

PREVIOUS ASSIGNMENTS

Digit7 India Private Limited (Sister Concern of InfoVision Solutions India Private Ltd.)

Senior Group Product Manager (Dallas, Bengaluru, Pune, and Coimbatore) Nov 2020- Feb 2024

Remote execution from Hyderabad

Teams Associated: Pre-Sales, Knowledge Repository Building and Product Training, Design, Product Management, Product Engineering(Back end, Front-End, DevOps), Quality Assurance, cross-product teams, DevOps, Solution articulation, Verification, and Validation – Proposal Solutions, articulate solutions (various areas of retail store and HQ systems)

Solutions Intel: eCommVerse, Digit Mart, Digit Kart, Digit Square, Digit Snap, Digit Robo, Brand/Media Monitoring Platform, Property Management System/s

Client Requirements Serviced: AAFES, 7-Eleven, Verizon, Vontier/Gilbarco Veeder Root, Neiman Marcus, InfoVision Social (Brand Management/Media Monitoring Platform Evaluation + High Level Roadmap including technical know-how research)

Vendors Liaising-Implementation Know-How Documentation: Stripe, Jumio, Avalara, TaxJar, Talon.One, Apple Pay, Google Pay, Kalibrate, Syndigo, Zoho - Desk, CRM, Books.

KEY DELIVERABLES

- ⇒ Developed and executed the product vision, strategy, and roadmap in alignment with the company's overall goals and objectives.
- ⇒ Led, mentored, and inspired a team of product managers, providing guidance and support in their professional growth and ensuring their success.

- ⇒ Defined and tracked key product metrics, regularly reporting on product performance and making data-driven recommendations for improvements.
- ⇒ Fostered a culture of innovation, collaboration, and continuous improvement within the product management team and across the organization.
- ⇒ Drove the product development process from ideation to launch, ensuring high-quality and timely delivery of products.
- ⇒ Acted as a product evangelist, effectively communicating product value propositions to internal teams, customers, and external stakeholders.
- ⇒ Conducted market research, competitive analysis, and customer insights to identify new product opportunities and improve existing products.
- ⇒ Collaborated with stakeholders across the organization, including engineering, design, marketing, and sales, to define product requirements and prioritize features and enhancements.
- ⇒ Stayed current with industry trends, emerging technologies, and customer demands, incorporating them into product strategies and roadmaps.
- ⇒ Collaborated with the executive team to establish and manage the product management budget, including resource allocation and investment planning.
- ⇒ Conceptualized and communicated solution requirements for an eCommerce ecosystem using ReactJS and React Native tools and libraries, leveraging cloud technology to drive digital transformation for the organization.
- ⇒ Designed and proposed Video Analytics for a leading retail chain, utilizing digital tools and technologies to enable a data-driven approach to business operations.
- ⇒ Created and maintained a comprehensive knowledge repository, including evaluation criteria, decision-making processes, and prioritized third-party API services, legal and data layer needs, order orchestration needs, and communication needs for the platform.
- ⇒ Trained and guided Scrum Masters and managed Atlassian JIRA and Confluence for a team of approximately 250 members, including engineering, QA, DevOps, and leadership.
- ⇒ Identified and evaluated learning and development opportunities for team members and onboarded partners to enable a robust Learning Management System.
- ⇒ Facilitated discussions on emerging technology solutions for Verizon's 5G Home Internet services, including WebAR, Virtual Reality, and AI+ML technologies, and contributed to ideation sessions.
- ⇒ Developed functional solution proposals for Super Shelf and Vendor Self-Managed Portal for 7-Eleven, enhancing operational efficiency and customer satisfaction.
- ⇒ Engaged in exhaustive checklist/roadmap conceptualization and theme identification to align with the brand persona and facilitate user interaction.
- ⇒ Conducted extensive research, evaluated front-end templates for Admin Portal, ReactJS, and React Native tools and libraries, and offered insights on QA automation tooling along with device and geography coverage.
- ⇒ Documented and shared the SaaSification Strategy and Security Assessment Questionnaire for legal and technical needs.
- ⇒ Identified and selected a robust Content Management System (CMS) conducive to the organization's digital transformation goals.
- ⇒ Led and managed the interview panel, conducted over 75 interviews, and collaborated with stakeholders to spearhead digital transformation efforts for various roles.
- ⇒ Contributed to the formulation of raw marketing language for the brand's value proposition and audience engagement.

Blue Yonder India Private Limited

Senior Product Manager

Jan 2020- Nov 2020

Teams Associated: Pre-Sales and Sales, Knowledge Repository Building and Product Training, Product Management, Product Engineering, Quality Assurance, DevOps (CI-CD), cross-product teams, Product Management -Executive guild, Special Interest Group/s, Customer Support, Business Analytics, Information Technology Group/s, Consulting/Implementation Services, Third-Party Engineering (Partner and Client engagement stakeholders), Release documentation

KEY DELIVERABLES

- ⇒ Defined business and product requirements specific to mobilization/digitization- Enterprise Store Operations solution working closely with our customers and partner ecosystem.
- ⇒ Assisted in defining the API, Mobile-Inventory Management, Business Analysts/Product Owners
- ⇒ Worked with Engineering Leads, Product Managers, and UX Designers and drive towards an MVP that builds measures and learns as teams iterate towards desired outcomes based on adoption and customer feedback.
- ⇒ Worked closely with scrum teams and Platform scrum teams to influence, prioritize requirements recognizing the market needs.
- ⇒ Developed a design-first, results-focused product strategy and roadmap.
- ⇒ Owned the planning and execution of product roadmap and its results alongside a Product Director and a Product Manager (collocated in Toronto and Bracknell). Collectively contributed to the solution roadmap

till 2024 (strategic and macro) and the immediate roadmaps (high-level features for API and mobile functional features) for quarterly releases till Feb 2022.

Keen Info Tek, Inc.

Client: 7-Eleven Inc., Irving, TX

Jan 2017- Nov 2019

Business Consultant/Senior Product Manager – Contractor

Program Teams: 7NOW, 7Rewards, 7Rewards Digital Analytics, Mobile Checkout, Alternative Retail Formats (Micro markets, Food Trucks, Office Coffee Services, Office Catering), Accounting Systems Improvement

KEY DELIVERABLES

- ⇒ Translated the CDO's initial vision into the 7NOW ecosystem, including functional features for customer apps (iOS, Android, and responsive web applications), store app (tablet and handheld), and admin portal. Acted as the subject matter expert across two release cycles.
- ⇒ Authored development and QA artifacts, prioritized work efforts, and derived conceptual feature sets using mind maps. Detailed features into functional, technical, development, and QA team resources.
- ⇒ Defined solution evaluation criteria, evaluated products, interviewed vendors, documented findings, and recommended solutions to business stakeholders with a strong business rationale.
- ⇒ Assisted the Product Director in defining design needs and participated in discovery exploratory and design discussions with UI/UX stakeholders to provide a high-level perspective of feature sets.
- ⇒ Documented and distributed requirements to development and quality stakeholders, scouted solutions, and performed competitive analysis.
- ⇒ Interacted with multiple parties across departments, vendors, and stakeholders to ensure everyone understood the business requirements and new features released in the applications they interacted with.
- ⇒ Identified, tracked, reported, and resolved issues promptly and devised guidelines for the QA team to follow, reducing lead time for developers to address them.
- ⇒ Researched and provisioned utilities and tools to streamline development and QA processes, coordinated with multiple teams, and evaluated hardware and accessories needs for the stores.
- ⇒ Served as the gatekeeper and semi-administrator for the collaboration tooling - JIRA, Confluence, and #Slack.
- ⇒ Educated the team on the ecosystem vision, mind maps, and detailed requirements as development progressed.
- ⇒ Worked with multiple third-party solution companies and evaluated and interacted with their competitors.
- ⇒ Assisted SEI Canada in identifying solutions to emulate the US solution for delivery and click 'n' collect operations.
- ⇒ Front-faced with external agile auditors to provide a business rationale and reporting pointers about why and how certain processes are followed within the scrum team
- ⇒ [Additional Functions Executed](#)- Contributions to various workstreams within 7-Eleven IT and Digital Teams
- ⇒ Designed and implemented a comprehensive solution for 7-Eleven's eCommerce Operations to enable the sale of 7Select Private branded and emerging branded merchandise across various marketplaces, including Amazon, eBay, Groupon, and Facebook. Utilized Skubana, Feedonomics, Informed.co, SellerLocker, and Communico for Marketplaces to ensure seamless integration and reporting.
- ⇒ Conducted in-depth research and analysis on Alternative Retail Formats, including Micro Markets, Office Coffee Services, Catering, and Food & Beverage Trucks, to identify potential business opportunities and gain insights into market trends and competition. Collated and presented intelligence on partners and competitors to inform strategic decision-making.

CAREER MILESTONES

- Acknowledged by the entire team, including Senior Management and Development stakeholders, for driving the 7NOW initiative and other key projects with minimal guidance. Recognized multiple times for exceeding expectations and delivering exceptional results.
- Led multiple initiatives independently, streamlining the team's workflow and ensuring the timely delivery of solutions within a span of less than six months. Spearheaded several critical projects that contributed to the team's overall progress.
- Independently identified and defined requirements for the global solution landscape, making several technical recommendations that will be implemented in the upcoming solution release cycles.
- Collaborated with cross-functional teams and provided valuable feedback on solutions being developed within the Digital team, prompting timely resolution of issues. Proposed several innovative ideas that have been included in the product roadmap for respective entities.

Keen Info Tek, Inc.

Client: Walgreens, Deerfield, IL

May 2016- Jan 2017

Business Consultant-Product Liaison-Retail Business Applications SME - Contractor

Program Vision- Spearheaded a program to equip Walgreens Store employees with a tablet device that will provide a holistic perspective of not just the product, placement, and pricing information. But, providing them with a way to manage their store operations (front-end and back-office) from a handheld instead of such

information being accessed from a terminal tied to the store's back-office room. My role in executing the vision has pre-dominantly been to understand the gamut of the store systems (currently deployed in 8000+ Stores) and craft the idea for the solution to be enabled on an Android-based handheld.

KEY DELIVERABLES

- ⇒ Active involvement with support and development teams of legacy systems (host systems) to seek knowledge and document the findings not limiting to the interfaces, programming and application deployment stacks, etc.
- ⇒ Authored the Weekly Executive Status updates, release highlights for senior leadership
- ⇒ Managed schedules, project scope, assets, and overall project organization to ensure requirements and project delivery dates are communicated, understood and executed upon
- ⇒ Liaised with the Product Owner team to arrive at the business requirements
- ⇒ Served as a functional bridge between offshore and on-site teams by holistically transferring knowledge to the offshore teams working effectively on the development deliverables
- ⇒ Lead several functional walk-through sessions by setting up the context of the program organized by business applications and IT teams seeking an understanding of the application to convert them into workable user stories
- ⇒ Maintained and managed the sanctity of Agile, Scrum project management tools-JIRA and Confluence
- ⇒ Actively shared retail and store systems domain knowledge to the team members spanned across Deerfield IL USA, Chennai, Bengaluru, and Jakarta, Indonesia locations (all the teams were new to the domain).
- ⇒ Functionally Lead the team to perform a top-down approach to estimate and size the functional depth of the applications, identifying the complexity of each application from the front of transitioning it over to mobile, identified and validated the use of each stakeholder system to understand the importance of each tenet of the store system.
- ⇒ Maintained a strong working relationship with various business stakeholders, UX/CX team members
- ⇒ Actively worked with the product owner team and Project Management Office (IT Team and App Dev Interfaces) to create, prioritize, and maintain the product backlog including semi-JIRA Administration

CAREER MILESTONES

- Innovated new strategies reducing time to transition knowledge to offshore teams.
- Supplemented workforce through online automation tools, resulting in decreased work fatigue among associates.
- Facilitated effective presentation of applications to executive stakeholders via the use of newly identified desktop utilities.
- Drove app production through the regular creation of status updates, management of schedules/assets/organization, and collaboration with stakeholders ranging from the Product Owner to IT teams.

Echidna Software India Private Limited www.syntaptech.com

Business Consultant – Contractor

Feb 2015- Nov 2015

- ⇒ Performed Market-Competitor-Partner analysis for the solution responsible
- ⇒ Responsible for product delivery and related integration with third-party host systems
- ⇒ Accountable for managing the outputs of cross-functional teams delivering the product to a finished state for external customers, within scope, timeline, and budget
- ⇒ Traveled to the USA for client demonstrations of the solution and sought active feedback and inputs to incorporate back into the solution
- ⇒ Worked as a senior member jointly with the Senior Management including the CIO and the Director of Retail Services
- ⇒ Worked on the product roadmap and was actively involved in the architectural discussions to provide pointers from the host systems along with the integration requirements
- ⇒ Handles activities with a diverse scope where analysis of data requires evaluation of identifiable factors
- ⇒ Provides functional know-how and actively involves particular generating test scripts for testing the solution
- ⇒ Co-ordinates project tasks on engagements with the Senior Members in the team. Provides operational direction to the overall scope of the customer and associate engagement solutions (www.syntaptech.com)
- ⇒ Provided internal training, implementation support activities, or work on internal development projects to the team members. Recently created a domain training collateral that will be used by the company for the overall training needs of the interns along with existing Subject Matter Experts

SRINI Group (Australia and India) www.srini.com.au

IT-Operations-Compliance Manager – Contractor

Apr 2014 – Dec 2014

BUSINESS BACKGROUND

- ⇒ Retail chain based out of 75, Jindabyne Road, Flinders, NSW Australia 2529 owning about TWENTY properties based out of the regional areas of VIC, NSW, and QLD
- ⇒ The company owns and operates all the stores from the head office based out of Flinders, NSW

- ⇒ Head office provides back-end support to the stores ranging from bookkeeping, payroll processing, IT management, records management, training, gets store team members certified on relevant certifications needed to operate the store, liaises with vendors from the sign-up to payment processing including any account-related issue resolution
- ⇒ Head Office team members are responsible for the overall compliances and statutory conformances fulfillment of the industry at stores

KEY DELIVERABLES/ACHIEVEMENTS

- ⇒ Successfully transitioned the backend business operations (including accounting, administrative tasks, IT support, and custom application development) from Flinders, NSW, Australia to Hyderabad, India, resulting in the creation of six new positions in India. Handled associate attrition in compliance with statutory regulations from the Flinders, NSW office.
- ⇒ Streamlined and modernized the company's operations by phasing out legacy, monotonous, and manual processes, and implementing easy-to-use systems leveraging free-tier components within AWS. This led to reduced fatigue and operational costs for associates at both the retail stores and head office.
- ⇒ Conceptualized and developed five transactional processing systems for the company, including a Cloud and Mobile Inventory Management System, Sales and Media Reconciliation System, Master Data Organization and Publishing System (agnostic of POS-BOS vendor at the store), Invoice Processing/Accounts Payable Workflow, and Record Management Systems.
- ⇒ Developed a comprehensive end-to-end action plan for the transition, which included handling system backups and restoration and transitioning of several logistically challenging processes using near-free utilities available on the internet.
- ⇒ Facilitated knowledge transfer sessions between the respective Australia and India counterparts to ensure a smooth transition and successful implementation of the new systems.
- ⇒ Established and created the position of an IT Support associate responsible for proactively monitoring the system's performance using minimally invasive tools and minimal support associate time.
- ⇒ Successfully negotiated with vendors for optimal sources and solutions that were viable for the business at hand. This included transitioning the VOIP-based phone system, desktop facsimile system, desktop, laptop, and POS hardware, network equipment, software, and web content design, development, and deployment.
- ⇒ Provided objective advice to senior management on the role of IT in the business and developed easy-to-understand presentations to convince them to invest in the development of new systems.
- ⇒ Authored job descriptions for the skill set needed and facilitated recruitment of the team members required for the India office.
- ⇒ Authored content for the corporate static website (hired a professional content writer with the required tone and content): www.srini.com.au.
- ⇒ Provided an IT vision and mission for the enterprise, making it self-sustainable in terms of not having to spend any recurring investments in IT.
- ⇒ Collaborated with the operations team members and identified niche product features that were unexplored and unexploited, and developed in-house software products tailored to the business's needs, leading to reduced IT expenses within the enterprise.
- ⇒ Designed a business model for the company to onboard other businesses and provide them with outsourced business operations.
- ⇒ Liaised with statutory bodies to understand compliance requirements and procured necessary equipment to remain in compliance.
- ⇒ Organized and facilitated the first-ever store manager's meeting, providing a platform for senior management to drive the business to the next level. Served as the "Master of Ceremony" to facilitate the dialogue between the stakeholders of the meeting.

Echidna Software India Private Limited (Bengaluru)

Business Consultant (Retail Store Systems Subject Matter Expert)

Dec 2013-Apr 2014

KEY DELIVERABLES

- ⇒ Served as an organizational ambassador for Echidna's retail solution, utilizing my expertise in retail, IT, and mobile application development to support the company's vision of developing a disruptive solution.
- ⇒ Defined business requirements and proposed a technical approach to meet product development needs.
- ⇒ Authored mind maps, user stories, use cases, and functional specifications for the development of the solution, which will be leveraged by the development team to integrate with external solutions such as Merchandising, Loyalty, Content Management, Enterprise Marketing, Campaign, Commerce, Pricing and Promotions, Space Planning, and other store execution systems.
- ⇒ Oversaw the activities of the integration/system integration team and provided guidance on exception flows to design and develop a data aggregator.
- ⇒ Collated content for the glossary of terms, user guides, training manuals, data dictionary, and systems specifications for end-users.
- ⇒ Actively participated in internal product grooming meetings, collaborating with Technical Architects and Senior Product Directors to drive the technical design of the entire solution.

- ⇒ Interacted with the sales team, providing a perspective on the solution and assisting with various sales enablers.

Kony Labs IT Service Private Limited, Hyderabad

Senior Product Manager, Product Management, Business Applications Group (Field Sales and Field Service- Mobile and Web Solutions)

Jun 2013-Dec 2013

KEY DELIVERABLES

- ⇒ Contributed to top management's vision, strategy, and development roadmap discussions and provided inputs at the module level.
- ⇒ Documented user stories and provided functional leadership for the development of Field Sales and Field Service solutions, with a focus on Document Management, Parts Management, Customers, and Task Management modules. Additionally, provided passive contribution to form designer, route management, and product master data modules.
- ⇒ Collaborated with the internal User Interface/User Experience team to develop UI/UX proposals for the solution.
